EDUCATION

University of Toronto
Sept 2024 - Apr 2028

Honours BSc — Computer Science & Economics | Research in Astronomy

Courses: CS/Programming, Differential & Integral Calculus, Discrete Math, Principles of Physics, Astronomy, Linear Algebra, Economics, University-level Writing

Stephen Lewis Secondary School
Grad. Jun 2024

Ontario Secondary School Diploma

Honour Roll (4 years) · Ontario Scholar · General Executive, Grad Council & Athletic Committee · Senior Male Athlete of the Year (Gr. 11)

EXPERIENCE

Software Developer & AI Engineer
Apr 2025 - Present

Freelance · Toronto, ON

- Design and develop custom websites and software solutions tailored to each client's goals and technical requirements, managing the full lifecycle from requirements through deployment and post-launch support.
- Enhance existing applications by adding new features, improving performance, and resolving issues across multiple concurrent client projects.
- Apply AI engineering practices — including prompt engineering, multi-agent orchestration, and LLM-integrated workflow design — to build intelligent products and accelerate software delivery, most notably as sole Project Head of Nyvo.

Social Media Content Manager
Jul 2024 - May 2025

Kustomade Renovations · Toronto, ON

- Developed and maintained content calendars showcasing renovation projects; created engaging before-and-after posts that boosted brand visibility across platforms.
- Handled client inquiries, provided preliminary estimates, scheduled consultations, and collaborated with ownership to align online marketing with business goals.

Designing Assistant & Assistant Project Manager
Mar 2022 - Apr 2024

IAAA Construction · Mississauga, ON

- Assisted architects and engineers with CAD drawings and design revisions for residential and commercial projects.
- Helped prepare schedules, budgets, and material lists; coordinated with subcontractors and suppliers on timelines and site requirements.

PROJECTS

Nyvo — AI-Enhanced Messaging Application

- Serving as sole Project Head and product visionary for a next-generation cross-platform messaging app (Flutter/Firebase) targeting iOS and Android — competing in the space of WhatsApp and iMessage with AI-powered differentiation.
- Pioneered an AI-driven development model: directing Claude as AI Project Manager to orchestrate multiple specialized AI agents across a 6-sprint roadmap, handling architecture, code generation, and sprint execution end-to-end.
- Designed the full system architecture — Flutter frontend, Firebase backend (Auth, Firestore, Storage, FCM), Node.js AI microservices (OpenAI GPT-4, Whisper, Google Translate), and Agora/WebRTC for real-time calling; overseeing AI features including smart replies, voice transcription, and mood-adaptive themes.

JPMorgan Chase — Software Engineering Simulation
Forage · Feb 2026

- Built a Spring Boot financial transaction processing microservice integrating Apache Kafka for high-volume message ingestion and deserialization using an embedded Kafka test framework.
- Implemented transaction validation and persistence with Spring Data JPA and H2 SQL, including entity modeling and balance updates across relational User records; connected to an external REST Incentive API via RestTemplate and developed a REST controller for balance queries — verified end-to-end with Maven test suites.

Personal Portfolio Website

- Designed and developed a fully responsive portfolio using Next.js, TypeScript, React, and Tailwind CSS with smooth scroll animations, project demos, and integrated resume download; deployed to Vercel and optimized for performance and cross-device compatibility.

Learning Management System (LMS)

- Built a client-tailored LMS featuring intuitive navigation, AI-powered real-time learning assistance, course enrollment, content delivery, and detailed progress tracking — delivered as a scalable, production-ready platform.
